

Scholarship Announcement:

[Disabilities Without Boundaries](#) still has scholarship(s) for a non U.S. athlete available!!

[Disabilities Without Boundaries](#) is an organization created by a group of women with physical disabilities who set a goal to summit of Mt. Kilimanjaro in order to raise money for a scholarship program. In September of 2007, four female Paralympic Alpine Racers and another disabled female athlete from 3 nations reached the summit of Mount Kilimanjaro, Africa. They did this in order to raise money for scholarships for female ski racers to attend NSCD racing program.

Scholarships are for a female skier or skiers with physical disabilities to be part of the National Sports Center for the Disabled ([NSCD](#)) Alpine Racing Team. The NSCD is located in Winter Park, Colorado USA and has one of the best disabled alpine training programs in the world. Whether you're just getting into racing or have already excelled, it's a great place to train! You will train alongside some of the best athletes from the U.S. and other countries. Most years, the NSCD Alpine Racing Team has more than 5 full time athletes from various countries that are on their National teams and between 5 and 10 full time athletes from the U.S. Disabled Ski Team.

We awarded scholarships to 3 American athletes last season and depending on need and interest there will be at least one scholarship available for racer from a country outside the U.S. This scholarship can be used to attend races or training with the NSCD and/or partially toward equipment needs.

The recipient will be chosen based on

- Long and short term goals of ski racing
- Commitment to the sport
- Financial need

In order to apply for this scholarship please submit your biography or resume along with a description of how this scholarship would help you, why you think you would be a good recipient and your upcoming ski goals. Please email this information or any questions to Hannah Pennington at hpennington@hotmail.com or Sandy Dukat at sandy_dukat@hotmail.com.
